

HOMELESS HEALING CAMP

Understand Crystal Meth Spirits called Addictions

Homeless Healing Camp

About

The healing camp is to show how the stomach (second brain) is integral to the healing of the mind and body. The healing camp will show how humans addicted to meth can be cured.

The healing camp is to prove how with the right inputs live foods & water, nine enzymes, marijuana and crystal (dope-a-dope), dandelion root coffee, love from the caregivers and knowledge from a spirit medium to explain addictions to win the battle against the spirit called meth.

Steps To Success

The ingredients needed to complete the healing camp.

- Location is key
- Medicines: THC and Meth
- Grandmothers with love
- City Police & Fire Station
- Local farmers: Hutterites
- Local goat farmer: raw milk
- Male meth users on streets
- Female meth users on streets
- Dandelion root coffee
- Water that is alive
- Male helpers
- Male cooks

Clients

The best test subjects are ones addicted to meth and are living on the streets now. The test will be on subjects, male and female to show how addictions can be cured using the methods shown in the document.

The space selected will be gated with two sections male and female. A spot in the middle for a fire to chase away negative spirits. Security guards on guard at all times to keep the spot clear of outside intruders.

A central food tent for the clients part of the healing pilot project. It will be where a fire will be utilized to cook some of the foods to put the smoke in the human to offer even more protection.

Homeless Healing Camp

Spirit Medium

A spirit medium is a human who uses spirits to pass on information to the human kind. Other types of spirit mediums include elders, priests, celebrities and musicians. The spirit medium will utilize spirits when speaking.

The information passed from medium to students is best by a fire when speaking in a public forum about the spirit realm. The information is to inform how spirits use human bodies and how to stop the abuse.

On the streets now are healers in training. As they heal, their gifts will appear without warning. Meaning a human who gets closer to themselves will begin to see their gifts.

Some are already using them but negative spirits are using their gifts to hurt others. A gifted one will just know how to heal another person. The gifts cannot be explained.

The spirit medium is named Timothy Samson Lewis but prefers to be called Samson. Samson has been in training since October 17, 2017. Samson gained knowledge from the spirit world but specifically a spirit called mother earth. The knowledge belongs to the community, but in this case, it belongs to the homeless on the streets with addictions.

The first gift introduced to Samson was the frequency gift, which all humans possess. The gift first appeared when shopping for the vegetables for a grant written for Jordan Principal where we were awarded two hundred thousand to do a grant on music and food. The gift or spirit allowed Samson to feel frequency in organic materials including humans. This spirit will be introduced to the project to ensure its success.

All foods will be a minimum frequency of 250. The foods from mainstream markets carry inferior and tarnished and altered foods. A food once altered will have a negative frequency and will cause you to vibrate at a dangerous vibration.

Humans in camp will see a miracle because we are setting up the parameters to witness a person to receive their gift to show us miracles. The algorithm for a miracle is frequency plus faith equals miracle. The ones selected will be filled with faith.

The person who deals with the spirit realm including elders is **not** allowed to take any monies to be part of the pilot project. Other types of payments are preferred. Pay for medicines for spirit medium. No money. Only rewards are to be given. Money seen by spirit world will stop the pilot project on its tracks.

Homeless Healing Camp

Protocols

1. No tobacco used as an offering.
2. Only marijuana plants as an offering.
3. Bathing protocols to wake water inside.
4. Fire protocols to chase away evil from space.
5. No money is given to spirit medium
6. Volunteers to be male & grandmothers only. No womb.
7. 100% Linen fabric only in the spirit room and on the humans.

Spirits

The information passed on from the spirit medium will include:

- Types of spirits: food spirits, water spirits, trauma spirits, paid spirits
- Attributes of spirits good and bad
- How they work to control humans
- What is a possession of a human
- Why are homeless acting that way
- What is a spirit guide to humans

Enzymes & Food

With the right inputs into the body, it will start the healing process. When the body has all the essential seven enzymes in the body, it will put the human to sleep, that is where the healing begins.

The seven enzymes include kombucha tea, milk kefirs, water kefirs, sourdough yeast, fermented vegetables, yogurt and sauerkraut.

Foods only to be purchased from the local farmers market. We seek local farmers who grew the food with no chemicals or gmo products. Hutterite farmers tend to be best farmers because of the love they put into the vegetable. Garlic is the star in this plan. It's essential to purchase a large batch of garlic infused oil to create all meals.

No microwaves are to be used near or during the cooking process. The activated water is not to be consumed at all by humans. The water consumed from microwaves attracts negative entities.

Homeless Healing Camp

Medicine

The patient is on the road to stop the dependency from crystal meth. The crutch in this case to stop the addiction is a mixture of two dopes called potent THC and crystal meth. The two dopes are ground into a powder and put into a pipe and a torch is to be used.

Over time the patient will seek the potent THC to provide that energy boost from potent sativas versus meth. Sativas are to be used in the am. Better sleep comes from potent indica in the pm.

The potent marijuana will protect the human from the meth spirits. Meaning, a grandmother type spirit stepped in front of the meth spirit and said GO AWAY. It is a protector plant in the spirit world. It is when the patient can sleep and not be bothered by enticing spirits. The medicine called marijuana will heal the patient in fast mode but also ensure the new frequencies do not cause morning sickness. Without the marijuana, it is a difficult road to recovery.

The medicine called marijuana is essential to get your child back from the spirit world. The smoke from the plant gets into blood and that smoke deters negative spirits from the human.

Dandelion Root Coffee

Dandelion root coffee will be picked by the homeless to replace their loved coffee with a new substance designed to rid the body of fats and toxins. The root must be picked properly to ensure the full healing properties are kept intact. Protocol and details help provide a different type of healing from mystical places not yet understood.

Small contracts to men and women past their child bearing years to dig the dandelion root with proper protocols (no tobacco:offer marijuana) and unwashed. The team can finish the dandelion root coffee inside the healing camp. The properties of the dandelion root compliments the enzymes and marijuana to all work as one to heal.

The dandelion root will be paid by weight and pay more than what coffee is worth for marketing purposes. The goal is to prove that dandelion root coffee will make you skinny and bring in the stomach that coffee destroyed. Coffee is the leader in the food spirit world. It's job is to break down your ego by destroying your beautiful body with a muffin top. Bye bye muffin tops I say. Hello ego.

Love is Key

Love is key to any start of healing to begin. Think of who you call when you begin to ache, a mother type figure. Grandmothers are necessary caregivers to ensure a bond is created to begin healing. A mother type telling you it's ok to sleep is helpful. The patient will wake up a few times to test the caregivers because they are used to being kicked to the streets and called every name in the book. Love is key to make sure these humans find peace again. Ten grandmothers will be paid for their services rendered.

Homeless Healing Camp

Location

The spot chosen is a location at the bank of the water in Edmonton, Alberta.

Construct a high fence that is closed off visually from all four corners. The reason being is the clients must not feel fear to begin the healing procedures. Attached is a visual of the inside of the healing camp. For one week it will be closed off so staff and volunteers of sorts do not have to go far to be part of the learning process.

The reason for the parking lot to do the pilot project is many will have a memory there and the sounds act as a vacuum or a vehicle running to soothe the patients to sleep. Moving the patients too far will create fear and take away from the success.

Security must be present at all times to provide the safe space necessary to start the healing process. Working with the local police enforcement is important to help provide that security for the homeless who are healing. Together we can change our own ideologies with an open mind and open heart.

Two main fires are to be started and left on from start to finish. Smoke and fire stops all negative spirits so there is peace and quiet. The fire also heals the body when it is felt on the body. The local fire department services onsite is important to ensure our safety when it comes to the use of fire. We want to be compliant to all local laws to ensure a successful pilot project.

The healing camp will be in 100% linen tents so the clients can sleep on the ground, where the healing happens. The patient is to eat and sleep on the ground. Have the clients eat with their hands. Do not raise the patient off the ground, so ensure the place is waterproof to ensure peaceful sleeps. A central fire to create a small community but to deter negative spirits. Fire has the power when you know it's power.

Wood for the burning fires will be sought from a local source from the farmers market. A batch will be by the fires to ensure the fires are burning at all times.

The spot will have a gravel floor and a wall will be erected that is painted gold. A plain wall that is over 12 feet is to be used. It will shine.

Tent City

A gypsy camp was just erected smack dab in the park by the life flowing water. Use this thought in how the sleeping areas are created. The feeling of safety is created when the proper fabrics and layouts are utilized.

The type of fabric used is very important. The use of 100% linen is a must because of its healing properties as a fabric and the frequency of the 100% linen. The 5000 hertz from 100% linen vs

Homeless Healing Camp

100 hertz from cotton is seen and felt by the spirit realm. These layers used in the construction of the sleeping facilities are important.

Food

The pantry and cooking area seen in the image attached. It has a fire in the middle for all cooking purposes. The main entrance is through the kitchen so the fire is seen twice so as to ward off any negative spirits that happen to come inside. Two fires are better than one fire to ward off negative spirits.

Food will be prepared in the food area so as to contain the energy put into the food from the cooks. We will instruct the cooks to control their thoughts and emotions when they are preparing the meals.

The food will contain nine enzymes hidden in the food prepared:

1. Sourdough Yeast is found naturally in the air and we eat the sir by eating the yeast. It is created by feeding it fresh water and flour.
2. Kombucha Tea is a liquid that has the same contents as a healthy stomach. The drink can ensure no human first from an overdose.
3. Fermented vegetables cooked in 2% salt brine for ten days are in sandwiches, soups, and all meals.
4. Yogurt will be created daily with the fresh goats milk. The yogurt used in soups, breads, and deserts.
5. Milk Kefir made with the fresh goats milk. Used in desserts and foods.
6. Water Kefir used in water drinks and smoothies.
7. Sauerkraut purchased from the farmers market. This enzyme is the king of probiotics and can be a side dish.
8. Dandelion root coffee picked by the homeless using strict protocols.
9. Raw goats milk provided locally.

Vegetables will be either fermented to create important enzymes to heal properly. Minimum ten days is required to cook the vegetables using 2% salt brine.

Herbs and greens like spinach, kale and cilantro will be turned into a paste cooked slowly with the infused garlic oil. These are stored in a cool place and the oil acts as a preservative. These make amazing side dishes to be dipped with naan bread.

The garlic oil is the long slow rendering of the garlic with all of its clothes, meaning do not remove the coverings. Use Saskatchewan flax or Alpha coconut oil (quality oil). Put on low heat and let it render at the slowest speed possible. The finished product is clumps of hard garlic with the important nutrition unpacked properly. The garlic is a powerful bulb that will soak up the nutrition from that field for up to three years. The slow rendering is the trick to unpacking the

Homeless Healing Camp

nutrients. Only use farmers market garlic to do this method. Garlic must be sourced locally to monitor what was put into the soil. Knowledge about your food is knowledge about your health.

The garlic oil will be used for the homemade toothpaste to begin healing their teeth from the fluoride. The mixture is baking soda and the infused garlic oil. It is used with warm water and a clean cloth to administer to the teeth with ease at first because of the intense burning in the beginning.

Fruits and Berries

We will source fruits and berries from the farmers market as the source to ensure it is fresh and no chemicals used in the growing process. Wild berries will be sought, especially wild blueberries.

Berries will be sought out because of their sugars needed to heal bodies. The clients will seek sugars as already seen by clients on the streets. Natural sugars like honey and berries will help to satisfy cravings from sugar like pastries and sugary desserts. These local wild berries include blueberries, raspberries, strawberries, and others sourced from the farmers market.

Meats

The only meats consumed during the healing camp will be fish (high fat content) locally sourced from the river. Smoked then sold to us at a fair price.

Imitation meat will be created using wild rice. The mind can be fooled into thinking it's red meat to fool the client cravings called parasites. We will be fooling parasites into eating bait to kill them using herbs and acids from healthy kombucha tea.

In documents is a case study started on a human to show the meals created to trap parasites. It was not completed but it was only to show how it works. Included is how the spirit world affects the healing of a patient.

Parasites

The clients will be fasting already and will be in a skinny state which is a good place to start. The parasites will be killed with herbs and kombucha tea. Parasites are passed from red meat to the human. The anger that exists now in the animal world belongs in the animal world, but when the red meat is consumed, the parasites are also consumed. The spirit world uses the parasites to control humans as they do in the animal kingdom.

Water

The water used in the food preparation and water served to all humans inside the healing tent must be treated like it is a live substance that breathes. Meaning it must breathe. The water

Homeless Healing Camp

must be subjected to open air at least one day to three days. Bubbles will begin to form on the sides of the container holding the life source.

The water has a memory and can remember the last images or sounds subjected to it. If you are to argue around your water, it will imprint the emotions and can be transferred to the human who consumes it.

The container **must not** be made from any type of plastic. The container holding the open water could be held in a copper container if a suitable one is found. No plastic water bottles are to be consumed inside the healing camp because it's dead and acidic in nature.

All water used will be cared for like it was a new born baby. A mother would not allow any screaming nearby because that act would wake up a sleeping growing baby. Words used around the water will be monitored by the cooks picked to prepare the meals.

Water is at its best when it is traveling down a moving stream. The act of moving is the act of ensuring live water is in the water to ensure the fish breathe. Stagnant water is where death will begin to fester but also where negative spirits will gather. Dead water attracts dead entities. Imagine how that affects a human always consuming dead water.

Chemicals and Soaps

No mainstream soaps or chemicals are to be used in the healing camp. The camp will create their own cleaning products made from quality vinegar and baking soda. A detailed recipe in documents.

Bathing and Bathroom Facilities

Bathing will be done on the knees versus standing up to the water spirit. Humility even to your water can go a long way. Imagine you are one of our brown brothers from Pakistan who bathe on their knees.

The bathrooms are to be close by so the patients are contained during this healing journey. Ones with the steel walls, mirrors, and facilities all enclosed. See the picked bathroom facilities in documents.

Tasks

The clients, volunteers and grandmothers will do tasks to educate and keep the mind busy. The tasks include the following:

- Sleep to heal body
- Sit by fire to heal and listen
- Roast dandelion roots for coffee

Homeless Healing Camp

- Crochet 100% linen shirt
- Beading and sewing

Partners

The following organizations and partners are integral to ensure the healing project has the right building blocks for a successful healing project.

The local farmers market will source all foods including vegetables, fruits, berries, and meats including fish and chicken. Flax oil with no chemicals or gmo is the preferred oil for helping the body heal at fast rates because of its properties in the oil. Alpha Coconut oil is the second option for creating the infused garlic oil. The flours will be made from scratch using local grain products. The sourdough starter requires daily feedings of water and fresh flour.

We will seek and utilize a local goat farmer to provide fresh goat milk for our baking and enzymes to help heal the mind and body properly. The local goat milk is essential in this project. The goat milk has important enzymes the body seeks to run properly.

The Hope Mission-Herb Jamieson Centre is where the healing camp would be most successful because of location and the services locally. I am hoping professionals including social workers can monitor and watch from the sidelines. Hope Centre to monitor the medicines and to ensure we are not irresponsible with the medicines. Educate on how marijuana is a medicine when combined with addictions. The magic is also in the spirit world when it comes to the plant.

The volunteers from local churches could help as instructors for crocheting. Again ensure a grandmother figure is chosen. Trusted grandmothers from the community is another avenue to seek caregivers who have children inflicted by an addiction. Educating is an essential step in the entire project. Knowledge is power for humans.

The success is created when local police & firemen are part of the healing camp. They help to create stability in the mind when it comes to safety. Sleep is their demon and the feeling of feeling safe checks that demon. It will also help heal past afflictions caused by miscommunication from local law enforcements.

Finance

035,000	Food Accounts: Market & Hutterites
010,000	Dandelion Root Coffee
025,000	Tents & Bedding
010,000	Glass & Cooking & Materials
010,000	Goats Milk: Local Farmer
010,000	Medicines: Dope-A-Dope
100,000	Total

Homeless Healing Camp

Food Accounts

Food accounts are useful to allow the shopping of ease when we need the food. The foods include grain berries to make flour, lentils, garlic, sauerkraut, fruits and berries, honey, greens, herbs, and flax oil.

Dandelion Root Coffee

Contract men and grandmothers from the streets to pick the root at a specified price per weight. We want to give back some and learn how to turn back time. A protocol manual on how to pick the root to ensure all is done with respect and humility.

Tents and Bedding

Purchase 100% linen bedding for the clients, helpers, grandmothers, cooks, and the food tent. Including clothing made of 100% linen only.

Glass and Cooking Materials

Fermented vegetables to be fermented in glass containers only. Cooking materials for over fire and professional cooking apparatuses. Useful tools include a rice cooker, slow cooker, and grain to flour grinder.

Local Goat Milk

A local farmer will be sought to provide goats milk for everyday use. Fresh milk daily is the goal to ensure the quality and safety of the clients.

Male Helpers

Male helpers will make any project a success. They are essential workers because they help with the small details: watching the fire, watching and fetching water, helping cooks, and cleaning.

The male helpers are not to have any phones to distract or bring in any new emotions. The helper must not be distracted when in the healing circle. Ensure the helpers are able to drop their life for a week with no outside stresses.

Grandmothers

Grandmothers are to be utilized in the healing camp. Volunteer grandmothers may assist but that is for the community to provide those free hours to the pilot project.

Homeless Healing Camp

The grandmother's chosen are to stay in camp and to also not have any phones to create any outside distractions.

Male Cooks

Because we are dealing with food and live humans, male cooks will be sought to follow the meal plan created. Red Seal is good but not necessary. Love is the key. Not money.

Medicines

- Potent THC Sativas & Indicas
- Marijuana Flower
- Crystal Meth

Documents

Green Feather Foundation Inc.

A branded non-profit organization and a business plan to find investor(s). It will be created to apply the Fresh Model with five main components: Food, Renewable energy, Entrepreneurship and H2O. There are five areas chosen to help end conditions in local communities. The organization is created for the grandmothers to start and manage.

- [GFF Handbook](#)
